9 September 2015

Dear Sonia

We are now on our second ComColor Copier and are able to make the following observations:

- The learners' knowledge and progress has improved with the use of colour over black and white on their worksheets.
- This has led to an overall improvement of academic achievement of 9.3%.

We can recommend the use of the ComColor copier for all educational institutions as not only is it an affordable route to colour copying, but it is also a tool for quality education.

Kind regards

J S CLARK
